

## PD - 500

This product is used for the immediate breakdown of solid grease in lift stations.

- It is not designed for dosage into or prior to grease traps as it instantly emulsifies grease.
- It is excellent for applications such as lift stations and slow drains that are adversely affected by grease and fat.

**PD 500** is a natural **100% biodegradable** solvent, made exclusively from plant extracts.

As with all solvents, this product has a low flammability point, the product should be used sparingly in lift stations, in order to remove any potential risks

- This product works immediately and removes all oils and hydrocarbon based substances
- **PD 500** should be used in just sufficient quantities to break down grease present.
- While demonstrating unsurpassed degreasing performance
- **PD 500** is non toxic, displays a neutral pH, is completely biodegradable and can be simply washed off if accidentally splashed onto hands.
